

Cardiology Biomarker Report – Heart Disease Screening

Patient Name: Sample Patient

Age: 55

Gender: Male

Biomarker Values:

Resting Blood Pressure (trestbps): 140 mmHg

Total Cholesterol (chol): 240 mg/dL

Fasting Blood Sugar (fbs): Normal

Maximum Heart Rate (thalach): 150 bpm

Exercise Induced Angina (exang): No

ST Depression (oldpeak): 1.5

ECG Findings:

Resting ECG shows mild abnormalities.

Impression:

The biomarker profile indicates moderate risk factors associated with heart disease.

Early clinical intervention and lifestyle modification are advised.

Note:

This report is generated for AI-assisted early screening purposes and does not replace clinical diagnosis.
